Re: Column Covers for Verizon Experience Job

Dear Bob,

I would like to thank you again for your company's efforts to assist us with a quick turn around with the column covers for this job. Thanks to your help, we were able to complete the job on schedule, and with great success! I hope that you realize the effort it takes to complete work so quickly and so accurately. We are pleased with the ease by which your product is understood and installed. And it is a pleasure to do business with a local company.

We look forward to continuing to conduct business with you in the future, and we will gladly recommend your services to others. I hope that you will keep us in mind should you or your clients require an installer for your product or for the fabrication and installation of ornamental and miscellaneous architectural metalwork that lies outside the realm of Pittcon's focus.

Thanks also for your work to assist with quotes for our bids with other work. Good luck in the New Year.

Sincerely,

A handwritten signature in black ink, appearing to read "Doug Koschalk". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Doug Koschalk
